## **CONSTRUCTION/DEMOLITION**

### **WASTE DISPOSAL REQUIREMENTS**

- Salvage and re-use of demolition materials should be practiced for all possible materials.
- Only inert materials i.e., concrete, brick and non-contaminated soils may be used as fill on or off-site of the project. The applicable Conservation Authority (Grey-Sauble Authority, Maitland Valley Conservation Authority) and the Ministry of Natural Resources (376-3860 – Owen Sound, 357-3131 – Wingham) are to be contacted if the proposed deposition of inert fill is in a wetland area or adjacent to a watercourse.
- All non-salvage, non-inert waste must be disposed in accordance with Ministry of the Environment and Energy requirements at certified waste disposal facilities, with the following exceptions or specifics:
  - tree stumps: at the certified waste disposal site or at Ministry of the Environment and energy approved Stump Disposal Sites;
  - asphalt: at the certified waste disposal site or stockpiled at an acceptable site to the Municipality with subsequent crushing and re-use as a road base;
  - asbestos: at the certified waste disposal site in compliance with Ontario Regulation 347;
  - contaminated soils: petroleum contaminated soils may generally be disposed at the certified waste disposal site subject to Ministry of Environment and Energy direction and approval/acceptance by the City.
- Burning off solid waste is not an acceptable/approved means of waste disposal under any circumstances.
- The Ministry of the Environment and Energy, Owen Sound District office, 1180 20<sup>th</sup> Street East, Owen Sound, 371-2901 (1-800-265-3783) is to be contacted if there are questions pertaining to the foregoing or other waste disposal activities.
